Saturday 25th February 2012 @ 10.00 am - 1.00 pm

*Brandsma Room, Ground Floor
Carmelite Community Centre
56 Aungier Street, Dublin 2*

CLINICAL SEMINAR SERIES 2011-2012

This new clinical seminar series offers an opportunity for psychoanalytic psychotherapists, trainees and those from other organisations and related fields (psychiatry, psychology, counselling) working with patients to come together to discuss matters relating to clinical practice. Each seminar features an experienced psychoanalytic psychotherapist or psychoanalyst who will begin by giving a short lecture on her/his clinical work, followed by ample time for questions and discussion. After a tea and coffee break, delegates will return for an hour-long clinical discussion on the theme of the seminar facilitated by the guest speaker. Each speaker will recommend an article on the theme of her/his seminar which will offer an introduction to some of the issues which will be discussed. Articles are available electronically in advance of each seminar, upon receipt of the booking form and registration fee. Each seminar has been awarded CPD points by the psychoanalytic psychotherapy section of the Irish Council for Psychotherapy (ICP). **There are a limited number of places available so early registration is advised.**

THE PRESENTATION

This presentation aims to generate discussion and to refresh familiarity with Winnicott's thinking for the familiar listener and to overview it for the novice. It first overviews Winnicott's life and thinking. It then looks in detail at his thinking on human development and subjectivity and at the limited yet useful analogy between the nursing couple and the patient/therapist couple. In conclusion it overviews the evolution of Winnicott's thinking since his death in 1971 to the present.

SPEAKER

Margaret Spelman PhD, AFPsSI is full member of the IFPP, ICP and EAP and a psychoanalytic psychotherapist working with adults in private practice in Castleknock since 1998. She has worked as a clinical and organisational psychologist since 1983 and as a senior clinical psychologist in various parts of the Irish public health services since 1990. Her experience of her own children as babies, her infant observation and clinical experience along with her previous work in the area of early intervention (the 0-5 age group) and with children and adults with learning disabilities and their families contribute to her sustained interest in the thinking of D.W.Winnicott. She has completed an M. Sc and PhD thesis on the subject.

SCHEDULE

10.00-10.10 Welcome and Opening Remarks

10.10-10.50 Lecture by Margaret Spelman

10.50-11.20 Questions and Discussion
